

Lantra 4x4 Professional Off Road Driver Training

Off-road training now plays an essential part in company driver training policy, ensuring that your 4x4 drivers are complying with current Health and Safety regulations and are working safely and efficiently.

Modern 4x4 vehicles are designed to enable your drivers to access areas that would not normally be available to regular vehicles, enabling you to get personnel and equipment across the most formidable terrain.

Targeted Delegates:

Any driver who is expected to operate a 4x4 vehicle beyond well maintained tracks or roads should attend.

Course Objectives:

Successful delegates will be able to:

- Understand the legislative framework for professional 4x4 use
- Assess the suitability and safety of the vehicle
- Control the vehicle, including the transmission and safety systems in a variety of conditions, both on-road and off-road
- Identify clearance and traction hazards ahead
- Assess the risks involved and plan low risk routes
- Ascend and descend hills, traverse side slopes, wade through water, cross ridges and ditches, drive safely in tracks and rutted areas
- Identify when emergency techniques may be required and implement them safely and competently

Course Duration:

All training carried out at a maximum ratio of 3 delegates/trainer.

- 2 Days for previously untrained operators.
- 1 Day refresher for previously trained operators.
- 1 Day upgrade from the 4x4 familiarisation course.

Venues:

Our main bases are in Ayrshire, Cumbria and Devon and we have access to approved venues across the UK.

Course Costs:

Costs for the course will vary depending upon venue, candidate numbers and equipment requirements. Rough prices using client supplied vehicles are as follows:

- 2 Day Professional Operator, 3 delegates - £950-£1450
- 1 Day Experienced Operator, 3 delegates - £500-£750

Please contact us for a quotation.

The Lantra 4x4 Professional Operator's course is certified by Lantra-Awards and is recognised by the HSE, local and national government, organisations, industry and throughout agriculture. It is accepted by all major landowners and main contractors who often require 4x4 drivers to prove competence prior to working on their land or sites.

Course Benefits:

- Improved efficiency
- Less down-time due to incidents
- Improved occupational health & safety
- Enhanced professional & corporate image
- Reduction in maintenance costs
- Having safe, effective and efficient operators
